PROFILE

I am a Frontend | Full Stack Developer with solid knowledge of HTML, CSS, JavaScript, and React. Throughout my training at the SoyHenry bootcamp, I developed strong abilities in web application development and problem-solving. My previous experience in customer service and education has strengthened my communication skills, teamwork, and adaptability to diverse environments and challenges.

PROJECT EXPERIENCE

Full Stack Web Developer – Cogo Tattoo Studio (October 2025)

Real project
Developed the official web application for a tattoo studio, enabling portfolio display and content management.

- Built a modular and scalable full-stack architecture.
- Integrated image upload and storage using Cloudinary.
- Designed a modern interface aligned with the studio's visual identity.
  Technologies: Next.js, Tailwind CSS, Nest.js, Prisma, Neon (PostgreSQL)
  Repository: https://github.com/Agustin5705/CogoTattooStudio

---

Full Stack Web Developer – Lienzo Culinario (August–September 2025)

Academic project – Henry Bootcamp
Designed and developed a gastronomic application that suggests dishes based on a personalized color palette.

- Implemented secure authentication with Auth0 and simulated payments with Stripe.
- Debugged and optimized the overall application flow for stability.
- Designed and refined a user-centered, visually engaging interface.
  Technologies: Next.js, Tailwind CSS, Nest.js, PostgreSQL
  Repository: https://github.com/Agustin5705/LienzoCulinario

Full Stack Web Developer – Masterpiece Haven (July 2025)

Academic project – Henry Bootcamp
Built an e-commerce application for selling posters and epic-themed artwork, integrating a functional backend with a dynamic and visually appealing frontend.

- Connected the frontend with the backend through REST APIs.
- Implemented dynamic filtering, responsive design, and a complete purchase flow.
- Managed products, cart, and order history within a scalable architecture.
  Technologies: Next.js, Tailwind CSS, Nest.js, PostgreSQL
  Repository: https://github.com/Agustin5705/Masterpiece-Haven

PROFESSIONAL EXPERIENCE

Administrative Assistant | Senior Agent (2012–2018)

Concentrix (formerly IBM project) – Global Services

- Developed client management, teamwork, training, and coordination skills, as well as problem-solving in credit card and stock market operations.
- Registered and managed corporate credit cards; handled tracking, billing, and monthly reconciliation.
- First experience related to software development: replicated a deprecated accounting application using Excel files to manage monthly billing control logic for numerous corporate cards.

English Teacher (2019–2022)

Alianza Atlántida | Private Tutor

- Taught according to the established curriculum, promoting teamwork and complementary skills to foster holistic understanding of English.
- Delivered personalized private lessons tailored to each student's needs and proficiency levels, from beginner to advanced.

Customer Service Representative (2023)

Alorica

- Handled customer support calls entirely in English with native anglophone clients.
- Strengthened adaptability to changing situations, procedures, and technologies, and further refined natural spoken English.

TECHNOLOGIES

Programming Languages: HTML, CSS, JavaScript, TypeScript
Frameworks & Tools: Next.js, Tailwind
Databases: PostgreSQL, Neon
Tools: Git, GitHub, Slack
